

NATIONAL HEALTHCARE FACILITIES & ENGINEERING WEEK

OCTOBER 15-21, 2023

Unleashing Innovation: Healthcare Engineering Excellence

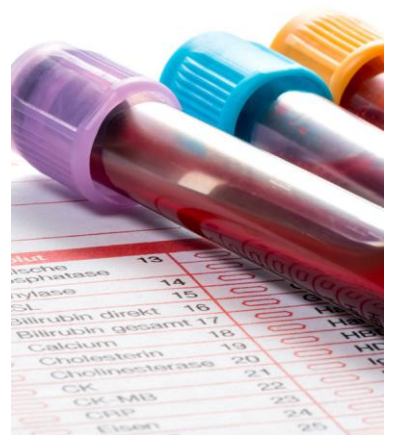

[PLACEHOLDER]

Right-Click and choose "Change Picture" and select your image from your files

Healthcare plant, maintenance and engineering staff are our in-house professionals responsible for facilities management, planning, design, construction and maintenance of very complex healthcare systems and equipment.

Our health care facilities rely on these staff to provide the necessary skills and resources to manage the environment of care within our organization in a responsible manner.
