

National Healthcare Facilities and Engineering Week

“Enriching Patient Experiences by Optimizing the Environment”

October 15-21, 2023

Recognizing the men & women who act as the gatekeeper of Healthcare Infrastructure

Proclamation

WHEREAS healthcare plant, maintenance and engineers are the professionals that are responsible for facilities management, planning, design, construction and maintenance of complex healthcare facilities, systems and equipment, in addition to safety, security, environmental management, and waste management in healthcare institutions;

And

WHEREAS Canadian healthcare facilities rely on these individuals and teams to provide the necessary skills and resources to manage the environment of care in their facilities in a responsible manner;

THEREFORE October 15 – 21, 2023 is hereby declared National Healthcare Facilities and Engineering Week to recognize and honour these healthcare professionals on behalf of all who thereby benefit from them.
