CANADIAN HEALTHCARE ENGINEERING SOCIETY (CHES) AWARD

Eric Juskow

A Message from the Dean

Dear Donors,

We are reaching out today to thank you for your generosity to Red River College, our students' success and your commitment to our Awards and Bursaries Program.

While the College looks to celebrate the achievements of our students at this time of year, the awards will be presented differently to ensure the safety of our RRC community and to stop the spread of COVID-19.

In lieu of gathering to celebrate these successes at our annual awards event, we would like to thank each donor for making awards and financial support possible for our Skilled Trades and Technology students. We are very fortunate to have such a vibrant College community and as a donor, you are an important part of who we are and how we continue to stay strong at this time.

Please visit **our website** to see a list of this year's Skilled Trades and Technologies awards recipients.

We are forging new innovative paths to ensure our students can continue with their studies and their careers. We understand our graduates will play a crucial role in rebuilding Manitoba's economy and their contributions to our workforce will be invaluable.

Your support as donors, alumni and partners have helped us grow into the robust and agile training institution we are today, which has positioned us to meet this challenge head on and continue to help our students become leaders in their chosen fields. Thank you for your support of our students, the College and each other during this difficult time.

We recognize the profound impact that this uncertain time is having on your own family, your work and your business. It is why we will continue to work diligently to support our students in continuing their studies and doing what we can to help the community. We want to work together to support you the way you have always supported us.

Please stay safe and feel free to visit rrc.ca/coronavirus to learn about Red River College's COVID-19 Student Emergency Fund and for the latest information on how the College is responding to this extraordinary situation.

Sincerely,

Derek Kochenash

Dean, School of Skilled Trades
and Technologies
