

**National Healthcare Facilities and Engineering  
 Week Let's Celebrate! October 13-19, 2024**

**ACROSS**

- 2 High Efficiency Particulate Filter
- 5 Volatile Organic Compound.
- 6 A device used with fluorescent and HID lamps to obtain the necessary circuit conditions for starting and operating
- 10 Electrical phase B
- 13 \_\_\_\_\_ air volume systems
- 14 CT Scanners emit radiation which is often contained by \_\_\_\_\_ shielding.
- 15 An area empty of people and clear of all activities other than occasional foot traffic
- 17 Heating, Ventilation, and Air-Conditioning
- 19 -7.5pa is the minimum recommended differential \_\_\_\_\_ in accordance with standard Z317.13-17.

**DOWN**

- 1 Canadian Healthcare Engineering Society
- 3 Anaesthetic Gas Scavenging System.
- 4 Indoor air quality includes control of \_\_\_\_\_ in the air
- 7 An \_\_\_\_\_ is an alteration to contract documents during the tender period.
- 8 Class A is an \_\_\_\_\_ care facility
- 9 Copper shielding is used in MRI suites to protect from \_\_\_\_\_ frequency interference.
- 11 Light emitting \_\_\_\_\_
- 12 Electrical phase A.
- 16 Alterations to contract documents after award are known as \_\_\_\_\_ orders.
- 18 Electrical phase C.
